

Fagron SyrSpend® SF

Superior Suspending Technology

Fagron SyrSpend® SF vehicles are a total solution that provide you with a convenient and efficient oral liquid dosage form. It uses patented Active Suspending Technology™ holding APIs in suspension longer for more accurate and consistent dosing. Formulated with meticulous attention to detail, no alcohol, parabens, sugars, gluten or dyes, SyrSpend® SF vehicles frequently are used for young and old.

Benefits of SyrSpend® SF vehicles include:

- Convenient, all-in-one suspending vehicles for compounding
- Supports adjusted and flexible dosage regimens
- Low osmolality, which minimizes gastrointestinal upset and diarrhea
- Extensive and growing database of scientific references for Fagron stability data and beyond-use dating

- Maximum compatibility with APIs
- Ease of administration with a pleasant mouth feel and taste masking
- Pre-weighed kits available to compound suspensions in minutes
