Gluten-Free
Dye-Free

Fagron's SyrSpend[®] SF Family of Products

SyrSpend SF, Fagron's Family of oral suspending vehicles, provides a unique formulation containing no methylcellulose or sorbitol. Because SyrSpend SF has low osmolality, pediatric, geriatric and other family members who have difficulty swallowing tablets or capsules can benefit from compounded suspensions.

In addition to low osmolality (<50 mOsm), SyrSpend SF provides superior suspendability and palatability. SyrSpend SF can be flavored to patient preferences.

The SyrSpend SF family includes SyrSpend SF liquid, SyrSpend SF preservative-free powder, and SyrSpend SF Alka, which contains an alkalinizing agent.

Beyond Use Date in SyrSpend SF & SyrSpend SF Alka

	Vancomycin HCl	Verapamil HCl	Omeprazole	Metronidazole Benzoate	Oseltamivir Phosphate	Gabapentin	Ursodiol
