AdherePacRx™

Medications packaged for easy dispensing.
Simple, convenient, healthy.

Compliance is easy with the AdherePacRx™ solution from TCGRx. These easy-to-open pouches contain all of a patient's medications for a given pass time. They can be automatically generated from ATP-Rx™ through an interface with your current pharmacy information system. Clearly labeled dosage strengths, instructions, and pass times help ensure all medications are distributed to the correct patient, every time.
