

Inpatient Pharmacies

From pharmacy design to inventory management and unit dose packaging, TCGRx offers you a comprehensive solution to help ensure the right medications get to the right patient, at the right time, in the right dose.

Outpatient Pharmacies

For outpatient pharmacies, TCGRx workflow engineers and consulting staff can maximize space and control inventory to help you build an effective MTM program or increase services such as vaccine programs and consultation.

Adherence Packaging

Medication compliance heavily impacts patient success and recovery. TCGRx helps your pharmacy promote patient compliance and greatly reduce hospital readmissions by offering safe and costeffective adherence solutions.
