

# Innovation in Secure Drug Delivery

*Simple, Innovative Solutions to  
Enhancing Drug Security Programs.*

Drug diversion and misuse presents innumerable risks for the healthcare industry. The installation of drug security programs continues to rise each year. Over 80% of US Hospitals now offer educational programs or guidelines on opioids. Ensuring protocol adherence and mitigating diversion temptations are central missions for these programs. Experts agree, including tamper-evident technology in your drug security program is a simple, effective way to provide an extra security level to your compounded preparations and controlled substances.

**Prep-Lock™** Tamper Evident Caps are an active deterrent to potential tampering or misuse. The Prep-Lock™ line of products provides tamper-evident solutions for IV Syringes, Medication Cassettes, Oral Syringes, IV Bags, and ENFit® Syringes. IMI understands the challenges our HCP must confront. We work closely with pharmacists and compounding professionals to continuously advance our devices to serve the healthcare industry. IMI has designed American-made tamper-evident closures for drug delivery devices for over half a century. Our quality, reliability and exceptional customer care have made Prep-Lock Products an industry standard for guarding drug delivery containers.
