WINLAND™ ELECTRONICS, INC.

Critical Condition Monitoring Specialists

Eliminate the need for manual collection of temperature logs.

Empower your staff to treat patients and focus on workplace demands, rather than manually monitoring equipment and collecting data to meet JCAHO, FDA, AABB and GMP requirements.

INSIGHT offers Temperature Monitoring along with Cloud-based Reporting

Develop response plans for all types of incidents. Setup standardized protocols by location, length of incident, type of product, and more with a few clicks of the system.

When a sensor falls outside of its threshold, notifications can be sent to recipients via Email, Text Message, On Premise Audible or Dashboard view.

Robust reporting capabilities with configurable and custom reports that can be accessed on demand.

Configurable Enterprise Structure simplifies remote management of devices.

Integrate Alert Relays into any wired or wireless Security System.

Robust System Security - protects stored and transmitted data's security, integrity and privacy.
