

DISPENSE & FLAVOR FASTER THAN EVER WITH THE FILLMASTER PLUS

"The Fillmaster PLUS makes reconstitution and flavoring much easier and more accurate. We don't hesitate to offer flavoring now because it's so much faster. It has even helped us bring in new customers."

-Mark W. RPh, Foster Drug

IMPROVE CUSTOMER SERVICE

The ability to dispense and flavor faster means wait times are reduced. Couple that with going above and beyond to make a child's medicine taste better, and you've just created a "Wow!" experience for that parent. They'll stick with you for life.

ATTRACT NEW CUSTOMERS

If there's one market that's always full of new potential, it's pediatrics. Successful pharmacies use the flavoring service to bring in new customers and capture an entire family's prescription business. It's a great reason for new people to visit your pharmacy.

INCREASE COMPLIANCE

When a child gets to choose the flavor of her medication, compliance rates go up dramatically. This holds true for both acute and chronic conditions. With the Fillmaster PLUS, you can even recommend best flavors to a parent, specific to the medication prescribed.

GROW THE BOTTOM LINE

Our top performing pharmacies charge \$3 for flavoring. They understand the value of the service and their time. In addition to the script and flavoring fee, you can expect increased OTC and front-store sales.

CUT COSTS

Bar code scanning saves time, reduces errors and cuts down on waste. It also confirms you've used the appropriate amount of water for reconstitution, reducing the risk of half-fills.

GAIN EFFICIENCY

The Fillmaster PLUS saves valuable time in your everyday workflow, freeing you up to do the things that will keep your business thriving. On average, you'll save 3 to 4 minutes per prescription.

REWARD YOUR EMPLOYEES

An investment in technology like the Fillmaster PLUS demonstrates to your team that you're committed to making their jobs easier. Flavoring is also a "technician friendly" service. With your approval, they will run with the program and have fun in the process.
