

The View Is Better Up Here

With Talyst, you can move your pharmacy from the basement to the C-Suite. We have no doubt you'll get used to the view from the top.

Historically, inpatient hospital pharmacy has been considered a cost center relegated to the hospital basement. Today, the pharmacy is a financial driver responsible for moving your business forward while increasing patient safety and improving systemwide healthcare outcomes.

Join Talyst at the 2016 ASHP Midyear Clinical Meeting in booth #1444 where we will debut our Analytics & Insights module.

Discover actionable analytics that will enhance your decision-making, assisting you to drive your pharmacy forward (and upward).
