

**DATARITHM™**  
INVENTORY CONTROLLED

**CONTROL YOUR INVENTORY,  
INSTEAD OF IT CONTROLLING YOU.**

**REDUCE YOUR  
PHARMACY  
INVENTORY BY 20%  
AND IMPROVE  
TURNS BY 4-POINTS.**

Optimize your prescription drug inventory and improve profits with Datarithm®—an intuitive, cloud-based inventory management software system for pharmacies of all sizes. Using our exclusive forecasting tool, reorder points are automatically reset for every item every month based on changes in dispensing patterns and management/owner preferences. Datarithm® then attacks overstocked and dead inventory through automatic, simple return and store-to-store transfers. Our cycle counting tool will assure consistent accuracy of your on-hand inventory. Plus, with our advanced analytics, Datarithm® provides insights on inventory trends, movement, availability, cost, customer service and task completion by pharmacy staff.
