

ONGOING **BUD** STUDIES AVAILABLE

## Extending Science One Step Further

**BUD** (Beyond Use Date) studies provide important information on the stability of a compounded preparation. Accurate results ensure that a medication has maintained its compounded dosage form. This quarterly update releases the results from **BUD** studies conducted by renowned institutions: *Hospital for Sick Children, the University of Montreal and the University of British Columbia*. The results of these studies have already led to the implementation of MEDISCA's **DYE-FREE** oral vehicles at various healthcare institutions.
