

# LESS IS LESS.

**We've refined our FDA-licensed PTS™ cartridges to require 20 times less raw material than conventional assays**, so that responsibility, rather than demand, can continue to guide our operations. Continuing our commitment to conservation, this technology allows us to support humane practices and optimize our resources while reducing the impact on horseshoe crab populations. Gain immediate access to LAL and reliably test for endotoxins in just 15 minutes – ultimately decreasing investigations, variability and retests.

Discover how to do more with less at [www.criver.com/nexgen-PTS](http://www.criver.com/nexgen-PTS).
