

It's a cold, hard fact

When it comes to product temperature accuracy, there is no room for error. Follett upright refrigerators and freezers feature our exclusive back-plenum air distribution which delivers cold air at six levels to ensure consistent top-to-bottom temperatures, even when heavily loaded with product.

- Forced-air cooling with maximum +/- 1C (1.8F) temperature variation throughout cabinet
- Full-featured alarming and monitoring
- Quick recovery after door openings
