

9 OUT OF 10 PHARMACISTS APPROVE

A 2014 MD Analytics study found that 94% of pharmacists in the United States approved of DripDrop as an effective Oral Rehydration Solution (ORS). An ORS, like DripDrop, is a proven ratio of water, electrolytes, and sugars precisely formulated to quickly replace fluids and electrolytes lost through dehydration.

Dehydration can be caused by heat, illness, allergies, prescription medicine, travel, and exercise. DripDrop ensures your patients can stay fully hydrated, so helps to prevent and treat dehydration. Take it from a fellow pharmacist.

- 2X the Electrolytes, and 1/2 the Sugar of Sports Drinks.
- 25% More Electrolytes Than Pediatric Solutions.
- Tastes Great Too!
