

Make Your Prescription Fulfillment a Competitive Advantage

Powered by NEXiA

Smart, comprehensive, and flexible: iA is helping retail, government, and health system providers optimize the centralized prescription fulfillment lifecycle – from acceptance at the pharmacy through dispensing to inventory management and delivery to the patient via mail or back to the pharmacy for patient pick up.

Utilizing central fulfillment can mean fewer fulfillment burdens for pharmacists at the store-level, which can create more time to focus on providing better, revenue-generating patient care.

Do more with prescription fulfillment, to help lower your cost to fill.
