

Autonomous means greater efficiency.

Omnicell's vision of the Autonomous Pharmacy is to move pharmacists to the center of patient care where they can practice at the top of their license.

One way to do this is to replace manual, error-prone tasks with more accurate, efficient processes through our full suite of solutions including our advanced blister card packaging automation.

The VBM 200F is the only small footprint automation that efficiently and accurately fills and checks SureMed® by Omnicell® multimed blister cards. It uses unparalleled and proven vision technology to verify every medication for each individual blister before the card is filled.
