

Cultivate™

A PARASOL MEDICAL PRODUCT

Need assistance transitioning to the new USP <797> testing requirement? - We're here to help!

✓ Updated directions for use & log sheets

Our new log sheets and directions for use are user-friendly, easy to understand, and effective in helping our customers comply with the increased documentation required in the new USP 797 standard. We are committed to providing our customers with the support and resources they need to succeed and ease the transition.

✓ A variety of preassembled test kit options

Our PASS™ preassembled test kits provide a convenient, ready-to-use option that reduces the time required for setup. We offer a variety of preassembled test kit configurations that can mimic many different test procedures.

✓ Best in the market packaging

Unlike some of our competitors who only package preassembled test kits in trays, all Cultivate™ products are packaged in custom plastic trays. Our trays ensure that components remain protected during transport and can be easily wiped down, making them suitable for use in sensitive areas without requiring repackaging.

✓ Competitive pricing

At Cultivate™, we understand the importance of cost savings, especially as testing becomes more frequent, and we are committed to providing affordable options that meet our customers' needs. By having direct control over our manufacturing processes, we can offer our customers competitively priced products without sacrificing quality.
