

Are Your Patients Experiencing Side Effects From Their Statin Medications?

Discover a healthy business opportunity.

Statins are the most widely prescribed pharmaceutical in the world. In the United States alone, over 33 million adults use statins. It is estimated that seven million of these patients will experience musculoskeletal pain as a result of taking statins.¹

Statinzyme is an advanced supplemental formula that was developed by a practicing pharmacist to help prevent the harmful side effects of cholesterol-lowering medications, including these statins:

- **Advicor®** (niacin extended-release/lovastatin)
- **Atorvastatin Calcium**
- **Crestor®** (rosuvastatin)
- **Lescol XL®** (fluvastatin extended-release)
- **Livalo®** (pitavastatin)
- **Mevacor®** (lovastatin)
- **Pravastatin**
- **Simcor®** (niacin extended-release/simvastatin)
- **Zocor®** (simvastatin)
- **Altoprev®** (lovastatin extended-release)
- **Caduet®** (amlodipine and atorvastatin)
- **Lescol®** (fluvastatin)
- **Lipitor®** (atorvastatin)
- **Lovastatin**
- **Pravachol®** (pravastatin)
- **Simvastatin**
- **Vytorin®** (ezetimibe/simvastatin)

And these beta blockers:

- **Toprol xl**
- **Metoprolol**
- **Metoprolol xl**
- **Atenolol**
- **Coreg**
- **Coreg cr**
- **Bystolic**
- **Carvedilol**

Ingredients include:

- **Coenzyme Q10 (150mg)**
- **High Potency Fish Oil (40/20) (1000mg, 400mg EPA/200mg DHA)**
- **Evening Primrose Oil (400mg)**
- **Flaxseed Oil (400mg)**
- **Natural Vitamin D3 (2000IU)**
- **Resveratrol (50mg)**
- **Folic Acid (800mcg)**
- **B12 (250mcg)**
- **B6 (Pyridoxine) (50mg)**

Statin supplementation with Statinzyme may also further reduce the risk of heart attacks and strokes.
