

# Spotlight on Advanced B<sub>12</sub>

Superior Source is proud to introduce our new Advanced B-12, a combination of the two activated forms of B-12, Methylcobalamin and Adenosylcobalamin (AKA Dibenocozide) in equal amounts of 1000 mcg each (a total of 2000 mcg per tablet). In the body, the liver converts dietary B-12 to these activated forms. Superior Source's Advanced B-12 is ready to be used by the body immediately. Best of all, our leading edge delivery system results in optimal absorption.

## A Vital Concept for B-12 Supplementation

- Avoids loss of potency in the high acid environment of the stomach
- Perfect for vegetarians who may not get sufficient B-12 from plant based foods
- Bypasses the need for intrinsic factor which decreases with age<sup>1</sup>
- Almost 40% of Americans are running low on B-12<sup>2</sup>

## MicroLingual®: The World's Best Delivery System

Superior Source MicroLingual® tablets dissolve on contact under the tongue, making them immediately available for absorption. Formed with proprietary Low Pressure Hydromolecular (LPH) technology, the soft-molded tablets contains only a small amount of acacia gum to hold them together. MicroLingual® delivery is key for those seeking efficient absorption.
