

# MAKE EVERY DROP COUNT

## UPGRADE TO STATE-OF-THE-ART BLOOD BANK REFRIGERATORS AND FREEZERS

Maximize blood banking efficiency with our advanced cold storage solutions, featuring generous storage capacity, precise temperature control, and an optional chart recorder for continuous monitoring. These units create the ideal conditions for preserving life-saving inventory, ensuring reliability when every drop counts.

### Industry Compliant

- Class II Medical Device
- 21CFR Part 820 Compliant
- AABB's Standards - Compliant Product
- EPA SNAP Compliant
- ETL and cETL Listed

### Optimal Storage

Units include stainless steel sliding drawers with a 400+ blood bag capacity for single door units and an 800+ bag capacity for double door units.

### Advanced Monitoring

Our models are equipped with advanced temperature monitoring systems and a full array of alarms.

### Efficient Cooling

Designed with natural, hydrocarbon refrigerants and variable speed compressors, resulting in minimal noise levels and reduced operational costs.

Preserving Life, Ensuring Safety  
Blood Bank Refrigerators and Plasma Freezers
