

How do you improve patient outcomes while increasing profitability?

With RMS' new integration with Ortho Molecular Products' Digital Replete Software, you can accomplish both!

Many commonly prescribed medications can cause drug-induced nutrient depletion. RMS can help you identify these potential nutrient depletions, offer pertinent nutrient depletion information, and display a supplement recommendation, all at the time the prescription is picked up.*

Looking for new ways to grow profits?
Contact RMS today and take advantage of our POS expertise!
