

Are you getting the most out of your staff?

Your staff could be focusing on other tasks that would make the pharmacy more efficient and productive.

Automate manual processes

We automate the portions of your pharmacy that don't require human contact including processing scripts from your PMS, printing labels, adjusting inventory, and sending scripts to autonomous blister card filling.

DOSIS Systems helps reallocate pharmacy efforts by looking at total production volume and what could be offset by integrated software and automated filling.

Software Integration

QS/1[®]

ANY PHARMACY
MANAGEMENT
SOFTWARE

This type of pharmacy management increases total output without additional labor expenses.

We'd love to give you a demonstration!

Seeing is believing with the DOSIS System. We can give you a full demo of a working system so you can see for yourself the value of DOSIS workflow.
