

*Reducing Cost  
and Pharmacist  
Check-Time,  
InSite by Talyst*

**The InSite™ Remote Dispensing System** provides pharmacies a superior medication dispensing solution. InSite is the preferred on-demand medication management system designed specifically for long-term care pharmacies. It allows pharmacies to place secure, automated medication dispensing units directly at the long-term care facilities they service; giving facilities access to pharmacist-approved medications 24/7.

- Dispenses patient-specific multi-dose medication packages right before each med pass, or on-demand to facilitate new patients, First Doses, and PRNs
- Streamlines pharmacy operations and improves efficiency
- Dramatically reduces fill-time and pharmacist check-time
- Reduces number of deliveries to long-term care facilities
- Provides down-to-the-dose accountability
