

THE ONLY **STERILE** HAZARDOUS DRUG KIT INTENDED FOR COMPOUNDING **STERILE** PREPARATIONS

USP <800> Hazardous Drugs - Handling in Healthcare Settings

Wipedown 1-2-3®'s three unique sterile saturated wipes deactivate, decontaminate, and clean to address exposure to most cytotoxic drugs. Their 12" x 12" size provides optimal saturation & coverage.

"Cleaning" the surface may just transfer the hazardous drug residue to other sources. "Deactivation" as preferred in USP <800>, renders the hazardous drug inactive. Be safe and deactivate.

USP <797> Compounding Sterile Preparations

Compliant to USP <797>, these non-shedding premium wipers are manufactured sterile for specific use in ISO 5 Cleanrooms.
