

Great New Bases from Freedom Pharmaceuticals

In continuing our dedication to provide product solutions for your pharmacy, we are pleased to introduce some exciting additions to our existing base lineup!

Freedom PolyMatrix Powder

Freedom PolyMatrix Powder can be advantageous for compounding prescriptions required by patients needing effective wound care. Freedom PolyMatrix Powder is a state-of-the-art dry powder that is able to form an occlusive moist dressing when applied to a wound area. It can be incorporated with a multitude of antibiotics, debriding agents, nutrients, and regranulating active pharmaceutical ingredients.

Freedom PEG Troche Base

Freedom PEG Troche Base is an innovative way to aid in efficiency with troche formulations. It has all of the properties of a PEG troche base with the added advantage of including commonly used sweeteners and thickeners. It can be used with the same active pharmaceutical ingredients as the normal PEG base, such as nutraceuticals, hormones, anti-fungals, and pain ingredients.

Freedom Derma Serum

Freedom Derma Serum is a light-weight, non-greasy fluid vehicle containing a complex of soothing humectants, antioxidants, and rich botanicals. Freedom Derma Serum may be ideal for delivering a variety of active pharmaceutical ingredients and dermo-cosmeceutical ingredients to the skin, or can be used alone as part of a basic skin care program.

As with Freedom's entire product line, these new products have been extensively tested to ensure we offer only the highest quality ingredients for your pharmacy.
