Intelliguard[®] RFID Solutions

Intelliguard[®] Kit and Tray Management System features countertop, under-counter or all-in-one cart workstation options to automate tray replenishment and approval processes.

Intelliguard[®] Inventory Management System offers a perpetual inventory visibility solution with RFID-enabled pharmaceutical storage cabinets that automatically update inventory each time the door is opened and closed. Features settings for Cold (2° - 8°C) or Controlled Room Temperature (20° - 25°C) storage and comes in sizes from small under-counter to large-capacity.

Intelliguard[®] Vendor Managed Inventory System provides manufacturers and distributors with a real-time visibility solution to enable consignment inventory and strict supply chain integrity. Features continuously monitored RFID-enabled cabinets for Cold (2° - 8°C) or Controlled Room Temperature (20° - 25°C) inventory storage. A web-based portal allows suppliers to manage inventory levels, loading and dispensing activity, expiry alerts and temperature excursions.
