

# CLIMB THE LADDER OF STERILITY ASSURANCE TO ACHIEVE GREATER PATIENT SAFETY.

## MIC DUAL EDU SYSTEM

The MIC EDU System by **Containment Technologies Group, Inc.** provides the utmost in patient safety – achieving one of the highest sterility assurance levels currently available in the open market. The MIC EDU System uses automated processing to sterilize all materials inside the manipulation chamber with vapor-phase hydrogen peroxide. The MIC EDU System achieves a validated sterility assurance level of  $10^{-5}$  – **this equals no more than 1 contaminated vial out of 100,000 preparations.**
