MEDICATION RECONCILIATION

Since 2005, **Health Care Systems, Inc.** (HCS) has focused on improving patient safety by improving medication reconciliation.

HCS Medication Reconciliation software automates medication history retrieval and provides a solution that meets and exceeds the Joint Commission's standard to maintain and communicate accurate patient medication information. **HCS** simplifies complete and accurate medication reconciliation across the continuum of care.

The solution includes the ability to:

- Obtain a patient's Prior Medication History including Medication Fill and Refill Information and previous visit information
- Analyze Prior Medication History
- Provide Medication Transfer and Discharge Reports electronically or through printed media
- Provide discharge instructions including patient education monographs and prescriptions (electronic, faxed, or printed)
- Communicate and link directly to existing hospital clinical information systems
