

RFID SOLUTIONS FOR CRITICAL INVENTORY

Pharmacy Reader

Automated Dispensing Cabinet

Patient Bedside Reader

Intelliguard Increases Efficiency

OF PHARMACY AND NURSING STAFF

By reading multiple tags within a tote or container, the **Intelliguard** Pharmacy Reader makes receiving distributor shipments at the hospital pharmacy efficient and accurate by eliminating the need for item-level scanning or manual counting.

Intelliguard Reduces Costs

THROUGH INVENTORY MANAGEMENT OF
NDC, LOT NUMBER AND EXPIRATION DATE

Real-time inventory control is maintained as medication is distributed within the hospital to an **Intelliguard** Automated Dispensing Cabinet (ADC). The ADC increases nursing efficiency by eliminating manual counting and item-level barcode scanning and through access to ambient and refrigerated medications in one location.

Intelliguard Improves Patient Safety

THROUGH MEDICATION ERROR PREVENTION

The **Intelliguard** Patient Bedside Reader assists with the compliance and verification necessary to eliminate medication errors through the Five Rights of Medication Safety: Right Patient, Right Drug, Right Dose, Right Route and Right Time.
