

Can Multiple Medications BE DELIVERED TRANSDERMALLY?

YES. Only Lipoderm® is on target when it comes to proven solutions from your PCCA member pharmacy.

Give your patients an alternative to hard-to-take, multiple medicines. By utilizing the advantages of this heavily studied transdermal delivery system, you can:

- Potentially reduce your patients' common side effects
- Increase your practitioners' confidence in your formulations
- Give patients an easy-to use, pleasant alternative to taking pills

Lipoderm is available in four unique formulations to better match your patients' needs. Each has been proven to deliver drugs through the skin.

LIPODERM is a hypoallergenic, elegant alternative to traditional PLO gels

LIPODERM ACTIVEMAX™ is used for higher percentages of salt forms of single active ingredients

ANHYDROUS LIPODERM is designed for use with actives that are unstable in water

LIPODERM HMW™ is proven to deliver drugs with high molecular weights through the skin

Compounds with Confidence!

- To ensure that your patients are getting the only transdermal to deliver multiple drugs simultaneously, make sure to specify Lipoderm. That way you'll know that your patient is getting the best transdermal technology available that is proven to deliver.
