The power of all clinical & drug reference in one source.

PEPID Pharmacist Pro with **AHFS** for Hospital Pharmacies

The only complete solution for hospital pharmacists.

- **Clinical conditions and disease profiles**

3,000+ profiles cover all specialties and allow you to search by indication

- **Drug information**

Entire AHFS is fully integrated into all content, in addition to OTCs, herbs, vitamins and minerals

- **Dosing calculators**

Weight- and BSA-based dosing calculators are integrated to promote patient safety

- **Drug interaction checker**

ranks by severity and provides pharmacokinetic and pharmacodynamic information

- **Drug allergy checker**

Interactive drug-allergy checker detects sensitivities at the agent level

- **Lab manual**

400+ lab tests include high and low interpretation, description and more

- **Toxicology**

The revered PEPID toxicology database includes antidotes, toxicology specific labs, identification and management

- **Patient education handouts**

Printable handouts provide the information patients need on their medications in easy-to-understand language
