

YOUR PRESCRIPTION FOR CONTINUOUS PATIENT SAFETY

We provide solutions that help maintain continuity of pharmacy services and patient safety after department hours, during periods of peak demand or in other times of need.

RemoteSolutions' pharmacists are an extension of your pharmacy service, adhering to your organization's policies, procedures and values. Our pharmacists are available 24/7 to answer questions and will contact your nursing staff or physician should consultations or questions arise. Pharmacy records are updated and kept current, allowing your facility's on site pharmacy staff more time to focus on daily operations.
