

Your next cash register shouldn't look like a cash register.

Introducing EvolutionPOS.

A special advantage for hospital pharmacies.

Most hospitals capture a small portion of their inpatient discharge prescriptions. The consequences include reduced patient compliance, elevated risk of recurrence and readmission, and lost revenue and margins.

EvolutionPOS makes it practical to turn those risks into competitive advantages. Dispatch pharmacy staff right to the patient's room. Rather than having family members queue up at the pharmacy window, you can offer unprecedented convenience for their transactions.

EvolutionPOS™ for Pharmacy, the next wave of efficiency.

Retail Management Solutions, the leading provider of POS systems for independent and outpatient pharmacies, introduces the next generation pharmacy POS.

You heard it here first. Customer-centric merchants will be replacing cash registers with portable terminals. We're always ready to provide you with conventional registers for our industry-leading Star-Plus, Star-Lite and Ultra-Lite POS systems. But you will gain efficiencies, flexibility and savings with EvolutionPOS.™

It places all the register functions in your hands. Scanner, card terminal, printer, signature capture and inventory.

The portable, handheld terminal communicates with your POS server, immediately, wirelessly and securely. One device

accomplishes customer check-out, recordkeeping and inventory functions, including:

- Interfacing with your prescription system
- Tracking by barcode
- Electronic signature capture and audit trail
- Payment processing, including FSA eligibility
- Receipts provided via email or printed on the spot
- Scan and sell OTCs as well

Our complete suite of inventory, ordering and back-end management tools remains available at your back-office workstation, as always. You probably won't mind that EvolutionPOS costs less than conventional POS systems.
