

Your next cash register shouldn't look like a cash register.

Gain these advantages and more:

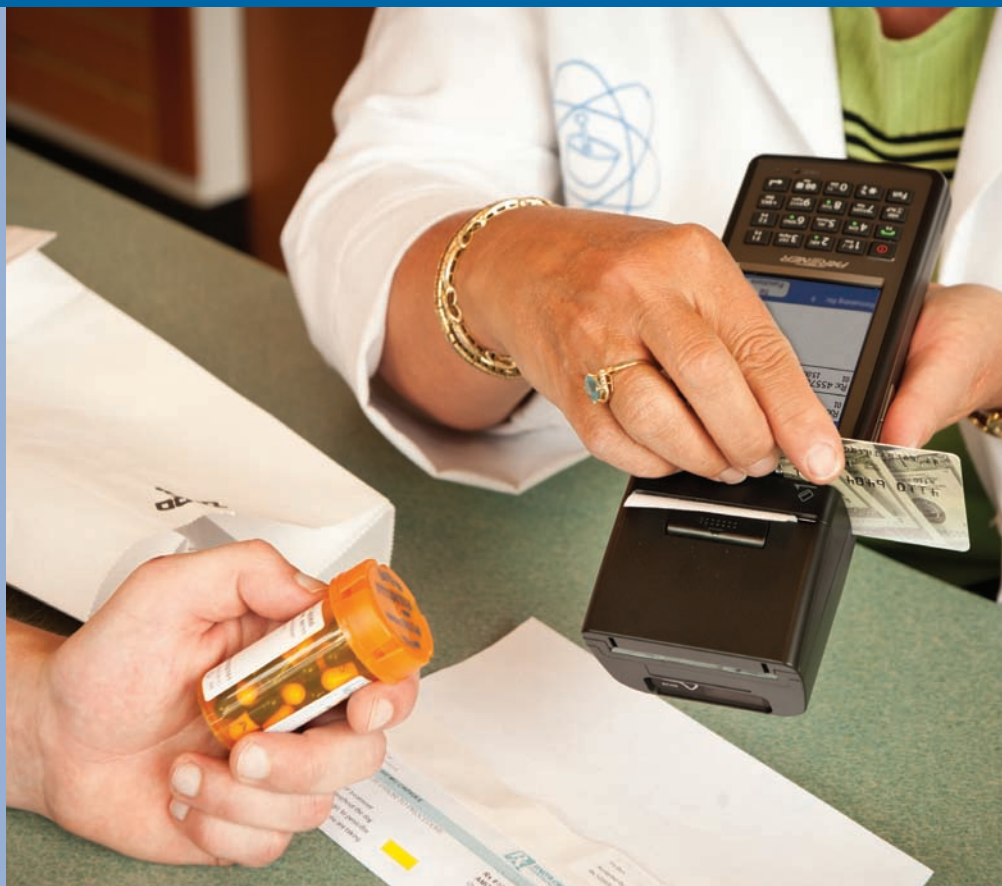

A register that doesn't require counter space

Smart RX retrieval

Reduce customer lines immediately

A smooth solution for sidewalk sales

New, eco-friendly email receipt option.

EvolutionPOS™ for Pharmacy, the next wave of efficiency.

Retail Management Solutions, the leading provider of POS systems for independent and outpatient pharmacies, introduces the next generation pharmacy POS.

The most practical cash register doesn't look like one.

EvolutionPOS™ is a handheld transaction terminal that accomplishes everything you expect at the point of sale – immediately, wirelessly and securely.

All the register functions are right in your hands: barcode scanning, payment card entry, electronic signature capture, receipt printing and more.

You will gain efficiency, flexibility and savings, in part because EvolutionPOS costs less than conventional POS registers.
