

Discharge
prescriptions
walking out
the door?

Time for EvolutionPOS.™

Capture those scripts in-house, to benefit your patients and the hospital.

Using EvolutionPOS, you can put full transaction capability right in the hands of pharmacy employees. With our mobile POS device, you can deliver discharge prescriptions, OTCs and counseling directly to the patient bedside, just before they depart.

Ensure uninterrupted patient compliance, which can help to keep readmission rates low, while gaining the prescription revenue. EvolutionPOS smoothly and securely accomplishes this by collecting payment, recording electronic signatures, and documenting each transaction in real time.

Contact us to discuss the best fit for your needs.
