

Finally, an innovative mobile dispensing cabinet solution with integrated compliance and control.

Introducing the MedRover mobile dispensing cabinet, the ideal solution for delivering medications to the patient bedside.

With MedRover, we've combined the mobility of a workstation-on-wheels with the security of a traditional dispensing cabinet. The result is a **narcotics-secured** unit that allows you to manage the dispensing process efficiently and accurately.

Contact Swisslog for more information about how MedRover will complete your medication management cycle.
