

“AUTOPHARM®  
ENTERPRISE  
GIVES US A  
COMPLETE  
SNAPSHOT  
OF OUR  
ENTIRE DRUG  
INVENTORY —  
IN MINUTES.”

Rafael Saenz  
Director of Pharmacy  
University of Virginia  
Health System

The University of Virginia Health System (UVHS) adopted Talyst's automation technology in 2009. With AutoPharm® Enterprise, UVHS has a perpetual inventory and a detailed tracking system that prevents drug shortages and increases inventory turns. The result is a decrease in inventory from an on-hand supply of 11 days down to 5 days and a reduced carrying cost of approximately \$500,000.
