Company Background

Helmer Scientific is a manufacturer and worldwide distributor of cold chain storage and processing laboratory equipment. We have over 35 years of experience in providing high-quality temperature controlled environments. Our products are used in over 100 countries throughout the world. Helmer originated in the blood bank market where precise temperature control is essential to the successful storage and transfusion of products. These same principles have been applied to the design and development of our pharmacy products.

Product Overview

Undercounter refrigerators are available in i.Series® and Horizon Series™ lines. The design is smart and efficient, offering both a 5 cf capacity model and our all new 4 cf ADA model. Helmer Scientific refrigerators are purpose-built and designed specifically for storing medication and vaccines.

They offer superior temperature uniformity, reducing fluctuations and hot/cold spots, and providing quick recovery after door openings. They also feature precise temperature control and reliable monitoring, further ensuring the safety of the products stored within.

The ADA models are designed to fit under 34" ADA compliant counters. They will help meet compliance standards for new construction and remodeling projects.

All undercounter models meet our outstanding performance standards for reliability and efficiency.

Features

■ Superior Chamber Temperature Uniformity

Stable temperatures and quick recovery are achieved with the heavy-duty, forced-air refrigeration system.

■ Advanced Alarm Monitoring

i.Series® models feature the i.C3® advanced user interface which offers constant temperature monitoring and control, access to multiple information logs, on-screen event acknowledgement for corrective actions, and downloading via a full-color touchscreen.

Horizon Series™ models include an integrated alarm monitor with visual and audible temperature alarms.

■ Bacteria-Resistant Powder Coating

The use of bacteria-resistant powder coating on the interior and exterior provides security as well as aids in the cleaning process.

■ Dry Storage Environment

Helmer has developed a refrigeration system that results in reduced humidity levels creating a dryer storage environment ideal for storing boxes and other containers.

■ Sustainable Insulation

Sustainable, U.S. EPA and SHAP approved Ecomate™ insulation is used in all undercounter refrigerators.

■ Designed for Convenience and Performance

Drop-down access panels, front serviceability, and front ventilation all contribute to an easy-to-use, reliable storage environment.
