Company Background

Retail Management Solutions is the industry leader in point-of-sale technology for retail and outpatient pharmacy. We enable pharmacists to easily streamline their business operations while providing optimal, efficient patient and customer service.

RMS is the only supplier specializing strictly in POS technology for pharmacies. Having installed more POS systems in the independent and institutional pharmacy markets than any other company, RMS systems have become the industry standard.

Our full suite of retail applications provides a seamless front-to-back store automation platform that is hardware independent. Our systems are rock solid and have built-in safeguards. If one machine is down, even if it is the master server, other machines remain up and running. Security and compliance underlie all RMS systems and modules. Redundant storage, encrypted communications and certified payment mechanisms ensure protection and confidence.

You can count on us for prompt service in all 50 states, 24 hours a day, seven days a week. We are a privately held company, with employees throughout the country — pharmacy technology professionals with hundreds of years of combined experience.

Key Customers

Client Base: More than 1,000 pharmacy customers rely on RMS systems.

Product Overview

EvolutionPOS, available exclusively from RMS, is a portable, handheld terminal that places all the register functions in your hands, so you and your employees can take the technology to the point of sale. The handheld unit communicates immediately, wirelessly and securely with your POS server.

A single device accomplishes the customer check-out, record keeping and inventory functions of a fully featured electronic cash register, including:

- Interface with your prescription system
- Tracking by barcode (scripts, OTCs and merchandise)

- Electronic signature capture and audit trail
- Payment processing, including FSA eligibility
- Receipts provided via email or printed on the spot

For retail pharmacies, this can provide peak-traffic capacity without requiring counter or check stand space. You can open a “line-busting” register immediately, whenever needed.

EvolutionPOS also offers out-of-store mobility, perfect for delivery to your customers’ homes and workplaces.

EvolutionPOS for Pharmacy is based upon the success of our highly successful POS platform systems, Star-Lite, Star-Plus and Star-Link for Enterprise.
