# Peace of Mind for Compounding Pharmacists by PCCA

Peace of mind comes from knowing that you are using the highest quality chemicals available. But for PCCA member compounding pharmacists, it doesn't end there.

**President:** Jim Smith  
**CEO:** David Sparks

## Company Background

At PCCA, we help pharmacists and prescribers create personalized medicine that makes a difference in patients' lives. Our members solve some of their customers' toughest medical challenges – all while running their own businesses. That's why we provide more products, more education and more support than any other organization. We're always working to help our members grow, and we've grown, too. What began in 1981 as a small network of pharmacists is almost 4,000 members strong, with 360 employees worldwide and five distribution centers serving the United States, Canada and Australia. At PCCA, we've made it our business to support compounding pharmacists every step of the way – and then some. It's all about bringing a level of service that makes you say, "WOW."

## Product Overview

While our members have access to over 4,560 active and non-active chemicals – more than any other compounding pharmacy supplier – the competitive advantage we bring our members is the industry's most comprehensive quality control and assurance program we bring to those chemicals every day. **Here is the Quality Difference that PCCA Brings to Member Pharmacies Every Day:**

### ■ Every Lot – Not Just the Initial Lot – Is Tested

- We do not solely rely upon the USP or manufacturer's label to ensure the quality of the chemicals received.
- Every lot received is tested using Fourier Transform Infrared Spectroscopy, ultraviolet-visible analysis, melting point, specific gravity, solubility, and chemical identifications.
- Additional testing of APIs is done using actual formulations.

### ■ 14 Checks and Analyses are Performed on Each Chemical Lot

- Nine qualitative and quantitative analyses are performed on every incoming chemical lot before it is released for repacking or sale.
- Each lot is tested against the certificate of analysis (C of A), including: USP, EP, NF, FCC, ACS and PCCA standards.
- After initial testing, all results are reviewed for accuracy by a second QC analyst.
- Chemicals are tested only by degreed Chemical Analysts.

### ■ PCCA Rejects Almost 200 Chemical Lots Per Year

- PCCA is fully registered by the FDA, DEA and State of Texas as a manufacturer and follows current Good Manufacturing Practices (cGMP).
- Only FDA-registered and GMP-certified manufacturers are used for the purchase of active pharmaceutical ingredients (APIs).
- Exclusive, proven bases and formulas.

### ■ Proven Bases for More Patient Options

With access to more than 60 proprietary bases – unavailable to other compounders – your PCCA pharmacy will have more options to treat your patients, from VersaBase® topicals, specifically designed for BHRT delivery, to Lipoderm®, the industry's only transdermal proven to deliver four drugs simultaneously.

### ■ Comprehensive Education is the Key to Compounding

Continuing education is the key to quality compounding solutions. Your PCCA pharmacy has access to more Accreditation Council for Pharmacy Education (ACPE)-accredited continuing education than anyone else. In 2014, PCCA will conduct more than 115 ACPE-accredited sessions across the United States, Canada and Australia, as well as scores of other training sessions from clinical and technician-related topics to sales and marketing.

### ■ Complete Support

Member pharmacies have access to the industry's best support with more than 30 pharmacists and pharmaceutical chemists on-hand to answer the toughest compounding and clinical questions. PCCA has more pharmacy consultants on staff than any other competitor, answering more than 500 calls a day from members with an average response time of less than 30 minutes.

## Testimonials
