Company Background

Humco Compounding is built on a proud history of more than 142 years manufacturing quality products for the pharmaceutical industry.

Through our innovative spirit and continued investment in research and development, we have established a reputation for creating, developing, and manufacturing a diversified line of high-quality non-sterile topical and oral pharmaceutical compounding bases. Our compounding bases are tailored to meet the non-sterile needs of compounding pharmacists while reducing the compounding preparation time along with the goal of improving the therapeutic outcome for your patients.

In addition to our innovation, we take pride in our exceptional customer service and our product quality. Our products are developed and manufactured adhering to the highest product quality standards. Humco is an FDA-registered establishment, in compliance with current Good Manufacturing Practices (cGMP).

We are committed to research and development, leading the way in Beyond-Use-Date (BUD) testing, absorption, and transdermal penetration studies. We are continually conducting scientific testing and studies, providing a valuable resource to our compounding pharmacists.

Product Overview

Humco's Tightening Base provides a firming effect on the skin, tightening and smoothing fine lines and wrinkles. It is uniquely formulated with Sodium Polystyrene Sucronate, a film forming polymer that creates a matrix and provides excellent binding to the skin, allowing the base to adapt to changes in facial expressions and movement without cracking or peeling. Tightening Base can be used to reduce the appearance of fine lines and wrinkles, as a moisturizer, or can be compounded to treat acne.

An in-vivo clinical study using Line Reduction-Image Analysis was conducted by Advanced Scientific Imaging Consulting Inc. The relative skin surface was analyzed as a composite and as a single point in any plane thereby making it possible to examine and compare several cutaneous parameters. The outer parts of the eyes of eight panelists were used to evaluate five parameters over seven days.

For a detailed study please contact our Compounding Resource Center.

Features & Benefits

■ Tightening Base Benefits

- Suitable for All Skin Types
- Comfortable – Allows Skin to Breathe
- Can be Worn for Four-to-Eight Hours, Including Night-Time Application
- Can be Applied Without APT's for Wrinkles
- Keratolytic – Can be Used Like a Peel

■ Ideal For

- Dermatology
- Acne
- Wrinkles
