## Company Background

TCGRx is a leading supplier of pharmacy automation and pharmacy design services. Our solutions range from individual components to address specific issues, to complete pharmacy design. TCGRx has an experienced staff and we pride ourselves on delivering high quality, reliable products that can be used, improved, and scaled, for decades to come.

## Product Overview

### ■ Beacon® Inventory Management

Beacon is a full inventory management system that supplements a pharmacy's current process. Beacon is unique because it tracks total pill quantity, inventory on-hand, and use. Beacon goes another level and provides information on specific bottles including quantity per bottle and expiration date tracking per bottle. Using our unique barcode scanning and light-guided pick-and-put process, Beacon can direct technicians to fill scripts following the priority of open bottle first, shortest expiration date second. Beacon can also manage your will-call with DeliverRx™ using the same barcode and light-guided system.

## Additional Products

### ■ PharmLoc™

Control medications and At-Risk-Medications (ARM) are securely controlled with PharmLoc. With access restricted to specified users, software controlled electronic locks require authentication for entry either through use of biometric scanning, personal token scanning or password and login entry. The system tracks all activities including who and when users accessed an ARM drawer. PharmLoc provides detailed documentation and auditing of all ARM usage.

### ■ Automated Tablet Packaging

Our Automated Tablet Packager (ATP®) is the industry-leading oral solid packager. Engineered to provide better performance

and reliability, ATP facilitates both unit dose and multi-med packaging with simple-to-use software. It can accommodate 128, 192, 256, 320, and 384 canister medications. The ATP can be integrated with automatic pill splitting, non-formulary filling in our unique SmartTrayRx™ system, self-calibrated canisters, and many other products that contribute to superior efficiency and accuracy in filling.

### ■ InspectRx™/Collector™

InspectRx gives pharmacies the confidence of knowing their pouches are accurate while increasing the throughput of the checking process. Pharmacies can track erroneous pouches and missing meds back to the source with an archived database of the front and back image of each pouch scanned. Pills are verified by identifying 12 physical characteristics and highlighting potential issues for pharmacists. Adding the Collector enables the rolling, cutting and taping of each medication strip vastly improving the speed of preparation for delivery.

### ■ HDStock™ Fixtures

HDStock high density fixtures can be customized and tailored to fit the look and feel of your pharmacy. The fixtures are unique in that they offer high density storage and can save as much as 50% of your current pharmacy space allowing for additional services without moving or adding more space to the pharmacy. Our fixtures facilitate all kinds of storage needs, bulk bottles, unit-of-use, liquids, and will call.

## Markets Served

Retail Independent, Retail Chain, Long-Term Care, Hospital Inpatient, Hospital Outpatient, Nutraceuticals, Central Fill, Specialty
