The company's headquarters are located in Austin, Texas, with offices and affiliates worldwide. For more information visit: www.epicor.com

Product Overview

Epicor Eagle N Series is a next generation, comprehensive and proven business management solution that works in concert with your existing Pharmacy Management System (PMS). It gives your business leading Point of Sale (POS), Inventory, Purchasing, Accounting, Marketing, and Customer Loyalty solutions that independent pharmacies need to outservice their competition, grow profits and operate more efficiently.

Key considerations for independent pharmacy owners include:

- Getting more wallet share and margins from new Affordable Care Act customers through better retail management.
- Seamlessly integrating retail and pharmacy management systems to optimize efficiency, accuracy and profitability.
- Managing large and diverse retail inventory for less waste and more profits.
- Immediate access to business intelligence at one or multiple stores, enabling proactive decision-making.
- Implementing a unique loyalty program to differentiate your business.

Epicor point of sale solutions offer high-speed credit card processing and electronic signature capture to reduce lines and provide fast, efficient, and secure checkout. At a time when owners and managers are always on the move, Epicor Eagle Mobile Manager keeps you connected with instant access to critical business information, vital alerts, reports, and more, right on a smartphone or tablet.

Epicor provides a true real-time solution that enables you to fully comply with HIPAA and other government requirements. It also ties into the

SIGIS approved database and is fully IIAS compliant. This allows your staff to accept Flexible Spending Account (FSA) and Healthcare Savings Account (HSA) debit cards along with major credit and debit cards, all while improving customer service and increasing sales. In addition, if your state is part of the NPLEx database, you can automatically check if customers are exceeding the federal purchase limits for pseudoephedrine at POS.

The Epicor Eagle Loyalty program is the key to identifying and rewarding your best customers, while collecting valuable data to fuel a wide range of marketing activities. With this program, you can give loyalty points, designate items to give extra points, print loyalty coupons on the receipt at certain levels, and provide rewards if customers purchase a set number or amount of certain products. Now you can have the same functionality as the large chain loyalty programs.

Epicor Eagle Inventory solutions offer the tools to manage thousands of varied SKUs, including expiration dates, pricing and more. Powerful wireless features make it easy to perform physical inventories and update system pricing right from the store floor. Your inventory database is updated automatically in real time, so sales staff and managers can always have up-to-the-second information.

Epicor Eagle N Series is set to retail best practices, and our business consulting team will train you on how to maximize these best practices. Our nationwide team of business consultants, product experts, local platform specialists, trainers, and technical support specialists are available from the start to help you. With more than 40 years of experience delivering true best-of-breed retail solutions and over 20,000 customers, there is no other trusted partner to help take your pharmacy to the next level.
