

KL100 Robotic Dispenser with “FillSafe” by Kirby Lester

Oversized, overpriced robots are a thing of the past. The new KL100 mid-sized dispensing robot is the smallest 100-medication system ever designed. Less than 5' deep, the KL100 manages 50% or more of total daily orders. And the exclusive “FillSafe” technology sets a new standard for medication security.

Company Background

Kirby Lester is by far the world's leading pharmacy automation provider. Kirby Lester maintains the largest market share of automatic tablet/capsule counter sales in 40+ countries. Over 40,000 customers worldwide rely on Kirby Lester for their counting needs. Kirby Lester's full line of technology provides solutions for any pharmacy that seeks fast, accurate and error-free medication dispensing.

Product Overview

The KL100 brings a new level of efficiency and safety to busy retail/outpatient pharmacies and central fill facilities. Fifty percent or more of a pharmacy's total daily orders can be easily dispensed. The streamlined KL100 is smaller than most pharmacy robots and easily fits into an existing floor plan without the need for renovation. It automates 100 of a pharmacy's top-moving tablets and capsules with minimum upkeep or distraction. The unique “FillSafe” system elevates security levels in the KL100; this new technology essentially prevents the possibility of dispensing the wrong medication.

Sizing Up Robotic Dispensers

All other pharmacy robots occupy much more floor space than Kirby Lester's KL60 and KL100, up to 6½ feet longer. Kirby Lester's robotic dispensers are compact, affordable, and hassle-free.

Product Specifications

Size: 29"W x 59"D x 78"H

Cassettes: 100 high-speed cassettes (2 sizes: standard & high-volume)

Counting Speed: Label, count and present orders in about 30 seconds

Unique Features

- Small footprint fits most pharmacies, no need for costly renovation
- Fully automates 100 medications (that's 50% or more of total daily orders)
- “FillSafe” security system provides an additional layer of security for cassette dispensing (a KL100 exclusive)
- Labels, counts and presents orders in about 30 seconds
- Fast, accurate cassettes never need recalibration and don't overcount/undercount
- Accommodates several of the most popular vial types and sizes
- Standard 110v power; no special compressed air or wiring needed
- Maintenance takes just a few minutes per day
- Industry best uptime and support
- Connects to Kirby Lester's tabletop counting and verification devices for 100% verification of all orders

Full Line of Automation

Kirby Lester offers more than just a one-size-fits-all box. We provide you with a full line of pharmacy automation to safely and quickly dispense 100% of medications. We help you choose what's exactly right for your pharmacy's unique needs.

- Full robotic dispensing: compact **KL60** (top 60 medications) and mid-sized **KL100** (top 100 medications)
- Eliminate hand-counting: **KL1**
- Count and verify every order: **KL1Plus** and **KL20**
- Automate and verify every order, ideal for narcotics and 90-day fills: **KL30**
