Medi-Dose® Inc.
EPS®

Company Background

Medi-Dose/EPS was founded in 1971 when Milton Braverman, a former pharmaceutical company territory manager, saw the need for inexpensive, manual unit dose packaging. He developed the Medi-Dose System to package, handle, and dispense predetermined amounts of medication so they would be accessible for one regular dose.

Because of the continued success of the Medi-Dose System, Medi-Dose/EPS expanded its product line to include a full-line of compounding supplies, disposable products, liquid packaging, labeling, and oral syringes designed specifically for the pharmacy professional. We pride ourselves on being the “old friend of the family” and have long-standing products designed to meet the needs of your retail, community, and compounding pharmacy.

Product Overview

■ Products for the Compounding Pharmacist

With Steri-Dropper Bottles, liquid packaging, oral syringes, labeling, safety products, and software, Medi-Dose/EPS is your pharmacy’s source for compounding supplies!

The science of pharmaceutical compounding poses unique challenges to pharmacists in the community setting. Whether caring for people or animals, pharmacists have to meet the stringent requirements of USP 797, 800, and other pertinent guidelines, address the unique concerns and conditions of their patients and do it economically and efficiently. Medi-Dose/EPS compounding products are integral solutions helping you manage this vital but complex process while providing the care and protection your patients need.
