Company Background

For over 50 years, NuAire has provided a wide range of primary engineering controls that meet USP <797> and <800> standards for hazardous and non-hazardous sterile drug compounding. NuAire's [C]-PECs options include compounding aseptic isolators (CAI), compounding aseptic containment isolators (CACI), biological safety cabinets (BSC), laminar airflow workstations (LAFW), containment ventilated enclosures (CVE), and custom robotic enclosures for automation. All equipment can be fully customized to meet your pharmacy's specific needs.

We create our premium-quality products with your success in mind; if you purchase a piece of laboratory equipment from us, we want you to be completely happy while using it. We'll help you work through any issues or difficulties until you are 100% satisfied for the entirety of your equipment's lifespan. We succeed only when you succeed.

Product Overview

I.V. workflow systems that utilize barcoding and gravimetric technology enable real-time error detection during the medication compounding process. All airflow products come fitted with unique HEPEX™ plenum technology for a more balanced airflow and quiet operation. All [C]-PECs are equipped with an ultra-efficient DC-ECM motor and an optimally determined forward facing blower. NuAire has developed pharmacy equipment configured to maximize safety and protection along with improving workflow efficiency and ergonomics.

Features & Options

- Smooth Interior Option for Easy Cleanability
- Optional I.V. Bar with Six SST Hooks
- Up to 12" (305 mm) Access Opening on Select Models
- Prop-Up Work Tray for Easy Cleanability

- Interior Duplex Outlet Options
- Sidewall Pass-Through Ports (NSF Approved)
- Optional Backwall Viewing Window for Monitor
- Optional Ergonomic Support Arm for Keyboard and Monitor
- Auto-Rising Adjustable Base Stand Options

Additional Product Lines

■ Blizzard™ -86°C Ultralow Temperature Freezers

Complete your pharmacy with NuAire's line of ultralow temperature (ULT) freezers. Every ULT model utilizes environmentally friendly, energy-efficient hydrocarbon (HC) refrigerants. All units provide quick pull-down times, precise temperature uniformity ($\pm 5^{\circ}\text{C}$), and optional redundant backup systems in the case of a power outage.

- Available Capacities: 100-828 Liters
- Temperature Range: -40 to -86°C
- Temperature Accuracy: $\pm 1^{\circ}\text{C}$

Trade Shows/Meetings Attended

ASHP Midyear 2022, December 5-7, 2022, Las Vegas, NV
