Company Background

Fagron continuously introduces innovative products based on research done in our own R&D center. We work together with pharmacists, universities, physicians, and other healthcare providers to deliver optimized products and solutions. We continuously perform studies on our products, dedicated to providing you with innovative compounding solutions.

Fagron's strategy is focused on the optimization and innovation of pharmaceutical compounding. As an R&D scientific pharmaceutical compounding company, Fagron wants to widen the scope of the prescriber to provide tailor-made pharmaceutical care. Through its activities, Fagron supports the unique selling point of the pharmacist and improves the patient's quality of life.

Based in St. Paul, MN, Fagron, Inc. is part of the Fagron Group, the global market leader in pharmaceutical compounding, headquartered in the Netherlands. With over 2,000 employees in 30 countries worldwide, the Fagron Group provides over 200,000 pharmacists with superior compounding products every day.

Product Overview

Fagron develops innovative concepts and solutions that respond to the specific wishes of compounding pharmacies and patients all over the world. In Fagron's innovation department, over 200 pharmacists worldwide are dedicated to developing and providing innovative concepts, products, and formulas that will meet the demands of the pharmacist, prescriber, and patient.

Fagron supplies compounding bases, such as powder mixtures, oral vehicles, and cream and ointment vehicles, for use in pharmaceutical compounding. Additionally, Fagron offers high-quality pharmaceutical raw materials to pharmacies. The product range also includes all equipment, instruments, and accessories used by pharmacists from efficient pharmaceutical compounding. This includes scales, mortar and pestles, ointment mills, and packaging materials.

Some key products and innovations include, but are not limited to:

- **Versatile™ Cream Base:** an all-in-one compounding cream base often used in compounding for pain.

- **SyrSpend® SF Family:** dye-free, starch-based suspending vehicles often used to prepare oral liquids for pediatric or elderly patients.
- **Fagron Advanced Derma:** a line of compounding vehicles designed with the latest advances in dermatological ingredient choices, providing a total solution for dermatological challenges.

Fagron Research & Development

Tailor-made care recognizes that each patient is unique. By collaborating with pharmacists, prescribers determine the best dosage from: dosage strength, administration route, and duration of treatment. Matching the optimal tailor-made medication with the patient's needs is the essence of pharmaceutical compounding.

Fagron leads the industry in discovering and developing innovative pharmaceutical compounding concepts to treat patients, thanks to our 45 researchers and 200 pharmacists located on four continents, extensive experience, state-of-the-art technologies, and total focus on pharmaceutical compounding. Fagron continuously develops innovative administration vehicles, such as creams and ointments, (transdermal) gels, and other pharmaceutical solutions and concepts to be used by prescribers, pharmacies, and patients worldwide.

Fagron Quality

Thanks to Fagron's superior global quality system, more than 200,000 customers worldwide have access to over 5,000 high-quality pharmaceutical raw materials, vehicles, and Fagron trademark products.

This system includes extensive product and producer qualifications, risk assessments, on-site GMP audits, vendor management, full analyses of incoming and manufactured products, and production and conditioning processes that comply with GMP standards. The process culminates in the release of the end-product after rigorous quality standards are met.

Fagron has sourcing offices in South America, North America, Europe, and Asia, which brings Fagron closer to the world's biggest producers of pharmaceutical raw materials. Fagron Quality employs over 150 people who are involved throughout every step of the supply chain and form the biggest network of quality assurance and quality control in the pharmaceutical compounding industry.

Fagron's superior global quality system guarantees not only the highest quality throughout the entire supply chain of our innovative concepts and products, but also supports these concepts with quality data such as independent stability and compatibility studies. This is why Fagron has earned an excellent reputation among pharmacies, hospitals, and the pharmaceutical industry.
