Company Background

Cervey was founded in 1983 by the fourth largest wholesaler in the U.S. Our pharmacy operations expertise provided valuable insight into operations and workflow. We built our software to address the challenges our customers were facing and have continued to evolve based on their needs. Our knowledge is what sets us apart.

Product Overview

■ 340B Split Bill Software

Cervey's 340B Split Bill solution is tailored to fit your unique challenges. Prepare for a HRSA audit with the click of a button using our Compliance Module, stay on top of multiple facilities with our Group Dashboard, empower your buyers with Split Preview, increase savings by capturing all items within a compound drug, and eliminate the frustration of managing master NDCs.

■ 340B Contract Pharmacy Software

Cervey's 340B Contract Pharmacy solution helps covered entities ensure compliance while optimizing financial performance. Conveniently access transaction data with our user-friendly drill down tools. Eliminate 99% of true-ups with our "pro-rated" replenishment model, streamline ordering with our order split feature, eliminate inventory swells and automatically send claims to 340B ESP with our new data transmission service.

■ Specialty Pharmacy Software

Cervey's Specialty Pharmacy software is specifically designed for hospital-based specialty pharmacies. Our EHR interface elevates the efficiency of your pharmacy and helps grow revenue by identifying potential patients before they leave the hospital. Streamline operations and patient management with custom assessment documentation, benefit investigation, pre-adjudicated test claims, and automated refill reminders.

Testimonial

"Cervey has exceptional customer service to their clients. Their knowledge of 340B is first class which serves their clients well in proper software setup and needs. The contract pharmacy tool is user friendly and Cervey is open to suggestions for future enhancements to support their clients. I feel that we have a true partnership with Cervey to meet our 340B regulatory requirements and reporting needs to assist us in managing a compliant program."

— Mike Loftus, RPh, MBA, 340B Ace, Director — Pharmacy Services
340B/Mercy

Newly Released 340B Features

■ **Compliance Module** that produces all the documentation and reports required for a HRSA audit at the click of a button. It stores covered entity documents including policy and procedures, Medicare cost report, and other files such as 340B Universe and/or employee roles. The crosswalk management tool allows users to create crosswalks of locations and purchasing accounts from usage data/accounts to Medicare cost reports to HRSA registration identification number (340B ID).

■ **Group Dashboard** that provides a financial and operational view across your health system all in one page — including 340B savings tracking, WAC losses, financial trends, and maintenance statistics.

Additional Product Lines

- Patient Assistance
- DQSA Track and Trace
- PBM Claims Management
