Company Background

Pharm Assess, Inc. has been a leader in supporting independent retail pharmacies with their business-related needs since 1996. Our goal is to help our clients achieve the highest level of business success through profitable outcomes and cost containment. This can be achieved through an expansive business plan that keeps a close watch on every aspect of the business operation.

We are a pharmacist-owned and operated company, in business for over 20 years, and have experience within all spectrums of pharmacy. We provide services designed to retain acceptable gross margins for our clients. Retail Business Solution (RBS) clients also have access to special programs designed to grow the business as well as offer help with today's challenges.

Product Overview

At Pharm AssessRBS, our goal is to assist independent retail pharmacy owners achieve the highest level of business success. We bring you a comprehensive Retail Business Solution (RBS) designed to make and save you money and help operate your independent retail pharmacies. We do this by managing compliance with the pharmacy staff credentialing, third party payer audit assistance, third party payer contract assistance with all payers, cash prescription pricing program, reconciliation, financial reporting, and 340B profitability. We fortify all of this by also providing our clients access to special programs like Co-pay Voucher Program, Vaccination Program, Synchronization Assistance Program, and Controlled Substance Patient Monitoring Program. Furthermore, RBS clients get access to ancillary services at no additional fee (i.e. iMedicare, Blood Pressure Kiosk, and much more) as well as assistance with exploring options regarding closed door, long-term care (LTC), and the acquisition or selling of pharmacies.

Testimonials

"The Pharm AssessRBS service is a very important tool to help manage and understand our business. It is very nice to be able to look back at previous years and compare them to the current year or period to identify any trends, or to just measure our position in the market. I like to see the unique patient count, as well as the scripts per patient reporting. It's very nice to get multiple reports at once versus running separate reports from our pharmacy software system."

— Kurt, Chief Operation Office, Multiple Pharmacy Locations, MO

"Our experience with Pharm AssessRBS is a slam dunk! The reports are timely, to the point, and chock-full of information about your business. The other great feature is you can be as "investigative" as you choose. You can drill down for the details or just read the summary and get a snap shot of how your business is progressing. The best part of this package is the people; always personable, helpful, and informative. I would recommend to anyone participation in this program!"

— Steve, R.Ph., Multiple Pharmacy Owner, LA

"The business of independent community pharmacy has changed a lot over the past 10-15 years, and as owners, we have to constantly manage and modify our business model. Pharm Asses RBS has given us the ability to dig into every aspect of our pharmacy business, analyze trends, develop corrective strategies, and ultimately make informed decisions based on real numbers."

— Tripp, Multiple Pharmacy Locations, MO
