## Company Background

For more than 40 years, Clean Harbors has helped thousands of healthcare institutions of all sizes manage their environmental and waste disposal needs. Our programs indemnify your institution and reduce your risk. We have the in-house experience, expertise, and resources to handle your complete pharmaceutical and hazardous waste program — beginning to end. Clean Harbors is the only environmental services provider that has the ability to manage 100% of your pharmaceutical and hazardous waste, spill cleanups, and facility maintenance within a company-owned network of 100+ service centers, 50 hazardous waste disposal facilities, and the largest hazardous waste incineration capacity in North America. This ability helps keep transportation and disposal costs down. You can also leverage our recycling facilities to reduce the volume of hazardous waste. Clean Harbors employees have one goal — to deliver the highest level of service to protect your institution and the environment.

## Compliance Management Made Easy

As a healthcare provider, we recognize that providing quality care to patients and their families is your utmost concern. When faced with so many state and federal regulations, hospitals can't afford to compromise their operations.

The Environmental Protection Agency (EPA) and your state environmental regulatory agency requirements pose significant compliance challenges to hospitals, which can impact efficiency and your bottom line. Clean Harbors is well-versed and stays current in environmental standards and regulations at the state

and federal levels. And because our pharmaceutical waste programs are managed 100% in-house, you are ensured the most reliable “hands-on” service in the industry, customized for your operation — whether you're a single hospital or a network of facilities in an IDN or GPO.
