Company Background

Fagron, Inc., a Fagron global company, is a leading developer and supplier of innovative delivery vehicles (creams, syrups, and lotions), bulk pharmaceutical ingredients, excipients, and high-quality compounding equipment. Based in St. Paul, MN, it is a U.S. FDA- and DEA-registered pharmaceutical manufacturer that strictly adheres to current Good Manufacturing Practices (cGMP). All batches are tested for identity, strength, quality, purity, and compliance with relevant USP or other monographs in Fagron's in-house analytical laboratory. With Fagron, you can always be confident you are receiving the highest-quality and fully-tested compounding essentials.

Product Overview

FagronLab™ is the first global product line of lab equipment specially designed for the needs of modern compounding pharmacies. The operation and design offer high-level accuracy, versatility, and ease-of-use through a wide range of customized features. This growing line of pharmacy solutions provides compounding professionals the efficient, innovative, and affordable solutions for today's pharmacies.
